

Dashboards, Reports, and Utility Bill Management

A unified, real-time view of your building's energy and sustainability performance

The EnergyReports™ Dashboards Edition leverages the WebCTRL® building automation system to deliver a 360-degree view of building performance so stakeholders can meet their energy conservation and savings objectives. Building upon the EnergyReports EcoScreen Edition, the EnergyReports Dashboards Edition allows operators to create graphs, charts, reports and dashboards to visualize building data, enabling them to:

- Convert energy consumption data to cost or carbon dioxide emissions
- Benchmark energy performance data against ENERGY STAR® scores
- Analyze and normalize energy consumption across buildings
- Identify performance issues to help maximize building efficiency
- Improve occupant comfort, productivity and engagement
- Review portfolio wide, year-over-year energy costs
- Gain insights that help drive energy conservation measures

Advanced data engines normalize, organize, and display data, giving you insights to drive improvements.

- Create your own energy dashboards using our simple drag-and-drop tools to analyze and share your data in unique ways
- Simplify utility reporting and distribute reports across departments with share data with key stakeholders
- Bring data to life with interactive and intuitive visualizations that provide value to anyone in the organization
- Visualize trends over time, understand what is driving your costs, and verify the accuracy of your monthly bills
- Utilize a growing library of pre-built charts, graphs, and reports
- Manage data collection of utility bills for analysis

Automated Logic's Building Ecosystem

Technology today that supports the buildings of tomorrow

Need
additional
capabilities?

A commitment to excellence that circles the globe

Automated Logic's global network of authorized partners is composed of system integrators with proven experience in building automation, energy management and control. Our network of more than 150 company branches and independently owned dealers guides customers through the process of designing, engineering, installing and maintaining all of our building automation products.

EnergyReports™
Analytics
Edition

Advanced Building Portfolio Analytics

Leverage advanced analytics, machine learning, and actionable insights to reduce costs, save time, and forecast and track performance. The EnergyReports™ Analytics Edition builds upon the EnergyReports Dashboards Edition by adding several key analysis and visualization capabilities for advanced energy management across your building portfolio.

EnergyReports™
Dashboards
Edition

Dashboards, Reports, and Utility Bill Management

Building upon the EnergyReports™ Eco-Screen® Edition, the EnergyReports™ Dashboards Edition leverages the WebCTRL® building automation system to deliver a 360-degree view of building performance so stakeholders can meet their energy conservation and savings objectives. The EnergyReports Dashboards Edition allows operators to create and share graphs, charts, reports and dashboards to visualize building data.

EnergyReports™
Eco-Screen®
Edition

Occupant Engagement

The EnergyReports™ Eco-Screen® Edition allows you to engage building occupants by showcasing your building's energy conservation and sustainability measures. It's an innovative way to bring your building to life, making its behind-the-scenes workings engaging and interactive.

WebCTRL® Secure Data Connector

Enterprise Level Security

A first in the industry, our connector establishes an authenticated (oAuth) push-based connection which provides outbound reporting of building & meter information and meter data to your EnergyReports cloud environment. The connector uses a secure and encrypted authenticated session (over SSL) which pushes information up to the cloud and does not require any inbound connectivity.

WebCTRL®

Building Automation Command and Control

The WebCTRL® building automation system gives you the ability to understand your building operations and analyze the results. The WebCTRL system integrates environmental, energy, security and safety systems into one powerful management tool that allows you to reduce energy consumption, increase occupant comfort, and achieve sustainable building operations.
