Automated Logic Honors Top Field Office, Dealer at Annual Distribution Meeting

KENNESAW, Ga., March 11, 2019 — [Automated Logic Corporation](#) (ALC) named its highly-coveted Field Office of the Year and Project of the Year at its 31st annual distribution meeting following the AHR Expo in Atlanta, Georgia. Environmental Control Solutions, Inc. (ECSi), based in Springfield, Illinois, took top honors with Field Office of the Year for its superior field performance, year-over-year growth and excellent customer service. ALC New York/New Jersey took top honors for Project of the Year for their work inside a 43-story New York City skyscraper that utilizes the WebCTRL[®] building automation system to monitor and control all of the building's heating, ventilating and air-conditioning (HVAC) equipment. Automated Logic, a leading provider of innovative building-management solutions, is a part of Carrier, a leading global provider of innovative HVAC, refrigeration, fire, security and building automation technologies.

“ECSi was selected as Field Office of the Year due to their years of dedicated service, their consistent quality of installation, and their unwavering commitment to their customers and employees,” said Rocky Moore, Midwest Regional Sales Manager for ALC.

ALC New York/New Jersey was honored for Project of the Year for their work in a skyscraper located in the Plaza District of downtown New York. Chosen as the replacement for the legacy building automation system, the WebCTRL system is now successfully integrating more than 1,000 data points from existing variable air volume boxes and induction units in the building.

“This project was truly a sales, operations and factory success. The ALC New York/New Jersey branch and operations team did an excellent job positioning themselves and executing the ALC product flawlessly. The end user couldn’t be more satisfied with their new system,” stated Larry Scholl, Northeast Regional Sales Manager for ALC.

At the annual distribution meeting, more than 300 ALC dealers from around the world were invited to visit ALC’s booth at the AHR Expo and attend educational sessions to hear product updates and best practices. ALC product managers were also introduced several new products, including the [OptiFlex™ BACnet Building Controller](#) and the [OptiPoint™ BACnet thermostat](#).
